

# Designer Manufacturer

## TV SCREEN PROTECTIVE CABINET

*Designed for large screens (LCD, Plasma, etc.) from 24" to 61".*

### Characteristics:

- The body of the cabinet is a single, thermoplastic form making up the front and side panels;
- Walls: PVC - 10 mm thick providing thermal insulation and watertightness for the cabinet.
- Material fully transparent to Wi-Fi signals;
- Protection against all types of internal and exterior environments: physical shocks, humidity, dust, etc. ;
- Cabinet can be wall-mounted;
- Heat extraction using fans and grilles;
- KDL cable gland system:
  - meaning cables can be fitted without having to remove the connectors;
  - The cable glands are in two sections which hold the cables in leaktight seals;
- Front panel: Transparent PMMA flap, thickness varies with environment.
- Screen control access hatch

### Advantages:

- Shock resistant
- Permanent protection

*Interior or Exterior protection  
for all types of TV screen*
