

Fixed and mobile workstations

LCD PROTECTION IP65 LEAKTIGHT

Foodgrade protective cabinet for LCD screens

Characteristics:

- Protects flatscreen monitors from splashes, washing, dust, temperature changes, cold, etc.;
- The rear & sides of the cabinet body is a single, thermoplastic form;
- Front cover in transparent thermoplastic PMMA, 6 mm thick, slides upwards on runners for access to the screen;
- The body is a composite material, 10 mm thick, making it watertight;
- Protected ventilation grilles on either side;
- Thermoformed panels making up the cabinet;
- Smooth, easy-to-clean surface;
- Cabinet can be wall-mounted;
- Screen mounting plate within the cabinet;
- Access to screen by a handle, screwed onto the casing on the top of the cabinet;
- Connectivity: KDL, screwed onto the cabinet base:
 - System of opening cable glands to allow cables to be passed into the cabinet without having to remove connectors or cut the cables themselves;
 - The cable glands are in two sections which clamp onto the cables within the seals.

*The perfect solution
to protect
your LCD screens*
